

THE ALL-NEW ŠKODA OCTAVIA

ŠKODA
SIMPLY CLEVER

DISCLAIMER : SUBJECT TO CHANGE WITHOUT NOTICE

LIVE LIKE YOU

Live wisely, live healthily, live happily, live together, live life. We are often told how to live. And for all those who don't want to listen anymore, there is now something to see: the new ŠKODA OCTAVIA. But not only because of its very impressive new design. The new OCTAVIA is a car for everything that comes into your head – or doesn't. Be it children, hobbies, style, speed or even cosiness. Equipped with lots of space, the latest technology and safety assistants as well as lots of clever ideas, you can concentrate on what counts the most – to live like you.

That's Simply Clever. That's ŠKODA.

EXTERIOR DESIGN

EMOTIONS IN MOTION

The OCTAVIA embodies the design trend of the ŠKODA brand: a fusion of aesthetics, safety and practicality. Whether you see the car as a whole or step closer and explore its unique features, the OCTAVIA radiates with the harmony of functionality and emotion.

LIGHT DESIGN

TIME TO SHINE

Advanced technology is made beautiful in the light design of the OCTAVIA. The car features full LED Matrix headlights, which offer greater road lighting and a higher degree of safety.

HEADLIGHTS AND FOG LAMPS

In exterior lights, the unique ŠKODA Crystal design is combined with an innovative solution. The top-end option comes with matrix technology.

Using a windscreen camera, the full LED Matrix headlights can detect a car in front of you or in oncoming traffic. Based on this, the high beam adjusts itself incrementally. This ensures you get the best view without blinding other drivers.

The headlights also feature a low beam function (Adaptive Frontlight System modes) created by a projection module in combination with a side light reflector. The system adapts the lighting to the steering wheel position. The excellent functionality of the fog lamps is powered by LED technology.

REAR LIGHTS

The full LED rear lights are fitted with animated turn indicators, which not only reveal where the driver is about to turn, but also add dynamism to the car. The rear lights also feature decorative elements, typical for the ŠKODA family. While the C-shaped illumination is updated with a modern twist, crystalline elements reference the Czech crystal glass-making tradition.

INTERIOR DESIGN

WELCOME HOME

The interior welcomes you with a perfect harmony of materials and colours. The dashboard refers to the car's exterior lines and emphasises the feeling of generous space. The infotainment display positioned high up on the dashboard, in the driver's immediate field of view, creates a pleasant symmetry. The attractive décor, chrome details and LED ambient lighting enhance the powerful impression.

STYLE AND FUNCTIONALITY

The car features a newly designed 2-spoke steering wheel. The top-end option comes with multifunctional leather steering wheel, which not only allows you to control the radio, phone and DSG, but also offers a heating function.

COMFORT AND SPACE

ŠKODA's craftsmanship is confidently presented inside. Surrounded by high-quality materials, you'll enjoy the ride no matter where you sit. The exceptionally spacious interior offers lots of legroom and headroom for the whole crew.

DECORATIVE PAD

The new OCTAVIA dashboard can be decorated with Suedia (shown) or fabric pad with stitching, which brings a unique style to the interior.

**SIMPLY
CLEVER**

GENIUS IS IN THE DETAILS

Simply Clever solutions make your life easier. Whether it's practical storage compartments or an ingenious towbar, these thoughtful features take the headache out of travelling.

WELCOME LOGO

The LEDs located on the underside of the front doors, creating the ŠKODA inscription, illuminate the entry area.

SUNGLASSES COMPARTMENT

This practical compartment located above the interior rear-view mirror is within the driver's and front passenger's reach. (Not available in combination with panoramic sunroof.)

PROTECTIVE WINDOW STRIPS

The protective window strips effectively prevent dirt building up in the space between the windscreen and body of the car.

DOUBLE POCKET

Organise your things even better with double pockets on the back of the front seats. Hide your notebook or laptop into the bigger pocket and your mobile phone into the smaller one.

JUMBO BOX AND DRINK HOLDERS

Small electronic devices can be safely stored in the Jumbo box in the front armrest. And when the air conditioning is on, you can even cool your snacks. For your drinks, there are drink holders with Easy Open function on the centre console.

COMFORT

HIGH-TECH, HIGH COMFORT

Sometimes it's good to let yourself be spoiled. While driving, for example. Plenty of thoughtful technologies and smart features are here at your command, ready to maximise your comfort and driving pleasure. Just put your foot down.

ELECTRICALLY-CONTROLLED 5TH DOOR WITH VIRTUAL PEDAL / AUTOMATIC COVER

The electrically-controlled 5th door comes exclusively with a virtual pedal enabling contact-free access. It can also be opened and closed at the mere touch of the button on the remote control, central panel, and directly on the 5th door. You can adjust the upper door position to suit your needs. In the combi version (not shown), the electrically-controlled 5th door can be accompanied with an optional automatic retractable cover.

When the 5th door is opened, the cover retracts automatically – providing easier access to the luggage compartment.

AMBIENT LIGHTING

Experience ultimate comfort thanks to the interior lights. LED ambient lighting, which can offer you many amazing colour options, includes lights running along the inside of the car, foot area illumination front and rear, door handle lighting front and rear, and luggage compartment lighting.

CANTON SOUND SYSTEM

Enjoy absolute sound clarity, whether it's music or the spoken word, from the Canton Sound System with twelve speakers, including a central speaker and subwoofer in the luggage compartment.

VIRTUAL COCKPIT

The Virtual Cockpit can display onboard computer specifications in combination with other information such as navigation, for example. The head-up display shows the driving data in such a way that the driver's eyes don't have to refocus, thereby significantly reducing the possibility of distraction.

READING LIGHTS WITH INTENSITY CONTROL

You can easily adjust the light intensity by holding your hand under the reading lights.

PHONE BOX / USB

The phone box creates an amplified signal for your mobile device and, at the same time wirelessly charges your phone while driving. This compartment is not only easily accessible but is also suitable for large display devices. Two USB-C data ports located in the centre console allow you to easily connect and pair your external devices with the infotainment system, without any need for dongles or adapters.

ELECTROMECHANICAL PARKING BRAKE

The new OCTAVIA is fitted with an electromechanical parking brake (as standard across all car versions) that has replaced the usual mechanical handbrake. The electromechanical parking brake acts on the rear wheels. It can be manually activated/deactivated by the button located on the centre console between the front seats.

SHIFT BY WIRE

As the first car of the ŠKODA brand, the OCTAVIA comes with "by wire" technology designed for maximum comfort in vehicles equipped with automatic transmission. The DSG shift by wire is controlled by a shift lever in a minimalist design integrated in the centre console.

KESSY

With the advanced version of KESSY (Keyless Entry, Start and exit System), which comes with the OCTAVIA model, all doors can be used to unlock or lock the car. The system is now enhanced by a new feature. When approaching the car at a distance of about 8 m (with the key in your pocket or bag), the system establishes communication with the key. At a distance of about 1.5 m, the system automatically unlocks the car without you touching the handle. If you do not open the door afterwards, the system will lock the car again.

SAFE HAPPENS

In extreme situations, where the driver cannot actively influence the outcome, the car's passive safety elements take over – like the airbags. You can equip your car with up to ten of them.

FRONT DRIVER AND PASSENGER AIRBAGS

While the driver airbag is enclosed in the steering wheel, the passenger airbag is located in the dashboard. If needed, this can be deactivated when a child seat is installed on the front seat.

FRONT AND REAR SIDE AIRBAGS

These four airbags protect the pelvis and chest of the driver and other passengers in the event of a side collision.

MIDDLE AIRBAG

The middle airbag is designed to provide restraint during passenger-side crashes when the driver is the only front occupant.

KNEE AIRBAG

This airbag, which is located under the steering wheel column, protects the driver's knees and shins.

PERFORMANCE

ENGINES

The range of powerful TSI and TDI engines reflects our continuous effort to reduce CO₂ emission levels. That's why we also offer the new Evo TDI engines. Thanks to the Twin-Dosing* technology, they produce up to 80% less NO_x compared to the previous generation. Our range also includes an iV engine with plug-in hybrid technology (PHEV). One of the interesting options on offer is the G-TEC version powered by CNG.

* AdBlue injection method.

POWER UP YOUR POSSIBILITIES

The new ŠKODA OCTAVIA iV offers the dynamism and efficiency of an electric engine for day to day urban driving and a 1.4 TSI engine for any trips outside the city. Always equipped with the Virtual Cockpit, the car can satisfy even the most diverse demands on exterior appearance, interior comfort, technology and connectivity, available in Ambition, Style and even in a unique RS version. Choose the one that fits you and relax into your seat.
